

## About Us

tsi-systems, the company:

tsi-systems has primarily been involved in application management and development of business critical, enterprise-wide applications since the company's inception. Established in South Africa in 2002, the company now services clients both locally and internationally.

tsi-systems is recognised as one of the leading service and solution providers specialising in enterprise application performance, diagnostics and quality management. The company boasts significant skills and knowledge of leading application platforms, providing best-of-breed open source and proprietary services and solutions to local and international markets.

tsi-systems have a distinguished track record, adding value to clients in the telecommunications, insurance and finance industries, where business critical IT solutions form the back-bone of the organisation's people and processes.
